

VITYARTHI PROJECT REPORT

Name: Sanskruti Kanoje

Reg No: 25BAI11315

Branch: B.Tech

Year: 1st Year

Course Code: CSE0001

Course Title: Digital Literacy

Date: 31/03/26

DIGITAL LITERACY

INTRODUCTION :-

This project focuses on developing essential digital literacy skills required in today's digital world. As a Student Digital Ambassador, the aim was to understand and promote responsible use of digital tools, online communication, and cyber safety. The project includes five tasks that cover different aspects such as creating an infographic, building a digital portfolio, exploring platforms, practicing professional communication, and understanding cybercrime. Through this project, I gained practical knowledge about using online tools effectively and maintaining a safe and professional digital presence.

Task 1: Infographic

- Tool used: Canva
- Created a one-page infographic on digital literacy

Content included:

- Meaning of digital literacy
- Common digital tools
- Safe internet practices
- Email etiquette

- Online professionalism

Learning outcomes:

- Improved creativity and design skills
- Learned how to present information visually
- Understood importance of clear and simple content

Challenges faced:

- Managing content within limited space
 - Making design clean and readable
-

 Task 2: Digital Portfolio

- Platforms used:
 - GitHub
 - LinkedIn
 - Kaggle

Work done:

- Created accounts on all platforms
- Added profile details

Purpose of platforms:

- GitHub → Share projects and code
- LinkedIn → Professional networking
- Kaggle → Data science and practice

Future use (4-year plan):

- Upload academic and personal projects
- Connect with professionals
- Participate in competitions

Learning outcomes:

- Importance of digital identity
 - Building professional online presence
-

Task 3: Platforms

- Platform used: HackerRank
- Tool used: Google Forms

Work done:

- Created HackerRank account
- Solved beginner-level problem
- Created a Google Form quiz

Quiz details:

- Title: Digital Literacy Awareness Quiz
- Included 5 questions

Learning outcomes:

- Improved coding and problem-solving skills
 - Learned how to create and share online forms
 - Understood use of digital tools in learning
-

Task 4: Email Etiquette

Work done:

- Created 2 professional emails:
 - Assignment extension request
 - Internship application
- Created social media checklist

Email components learned:

- Subject line

- Greeting
- Body
- Closing

Social media checklist includes:

- Do's and Don'ts of online behavior

Learning outcomes:

- Importance of professional communication
 - Avoiding informal language in emails
 - Maintaining proper structure
-

Task 5: Cybercrime Awareness

- Topic: Phishing

Work done:

- Created case study
- Created prevention checklist

Phishing understanding:

- Fake emails or messages used to steal information
- Users tricked into sharing passwords, OTPs

Prevention tips:

- Do not click unknown links
- Do not share personal details
- Use strong passwords
- Enable 2FA

Learning outcomes:

- Awareness about cyber threats
- Importance of online safety

- More cautious internet usage
-

Conclusion

- Learned practical digital skills
 - Improved understanding of online safety
 - Developed professional communication skills
 - Gained knowledge of useful digital platforms
 - Project is helpful for academic and future career
-
